Career Objective

MSc-Information Technology Post graduate with hands-on experience in Full Stack development using the MERN stack and mobile development with React Native. Passionate about building dynamic, responsive applications with efficient backend systems. Seeking an entry-level position to apply my skills in a collaborative environment.

Technical Skill:

- **Frontend:** React.js, React Native, JavaScript, HTML, CSS, Tailwind.
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, SQL
- **Mobile Development:** React Native, Expo
- **APIs:** RESTful APIs, Axios, Postman
- **Tools:** Git, Vs Code, Redux

Project Summary

1. E-commerce Website (MERN Stack)

MERN Stack | React JS | MongoDB | Express

Description of the Project: Developed a full-stack e-commerce website using the MERN (MongoDB, Express.js, React.js, Node.js) stack. Implemented user authentication, product management, and shopping cart functionality. Utilized Redux for state management and integrated Stripe API for payment processing.

Project Git link: <https://github.com/Amitbhivsane/MERN-Ecommerce-.git>

2. Aura Resume Builder

Next.js 16 | React | Tailwind CSS | React PDF | ATS Analysis

- Developed a modern resume builder that enables users to create professional, ATS-friendly resumes with real-time editing and live preview functionality.
- Implemented dynamic resume form management using React state, allowing instant updates across personal details, education, experience, projects, skills, and certifications.
- Built entirely using free-tier tools including Google Antigravity (Claude Sonnet), GitHub, and Vercel as part of the Digital Heroes challenge.
- **Outcome:** Successfully delivered a fully functional online resume builder capable of generating professional ATS-optimized resumes with live preview, ATS analysis, and one-click PDF export..

3. Multi-Language Web Application

This is a React.js front-end web application that supports multiple languages using React i18n (react-i18next) for internationalization. The project is built with Vite for faster development and optimized performance, and it uses Tailwind CSS for a sleek, responsive UI. The application fetches content dynamically from a JSON file, making it easy to manage and update text in different languages.

- **Language Selection** – Users can switch languages from a dropdown or button.
- **i18next Loads Translations** – used for lang translation
- **Dynamic Rendering** – Content updates instantly without page reloads.
- **Responsive UI** – Tailwind CSS ensures mobile and desktop compatibility.
